Clerk&Counsel

How We Work

A virtual clerking, lead generation and business development service.

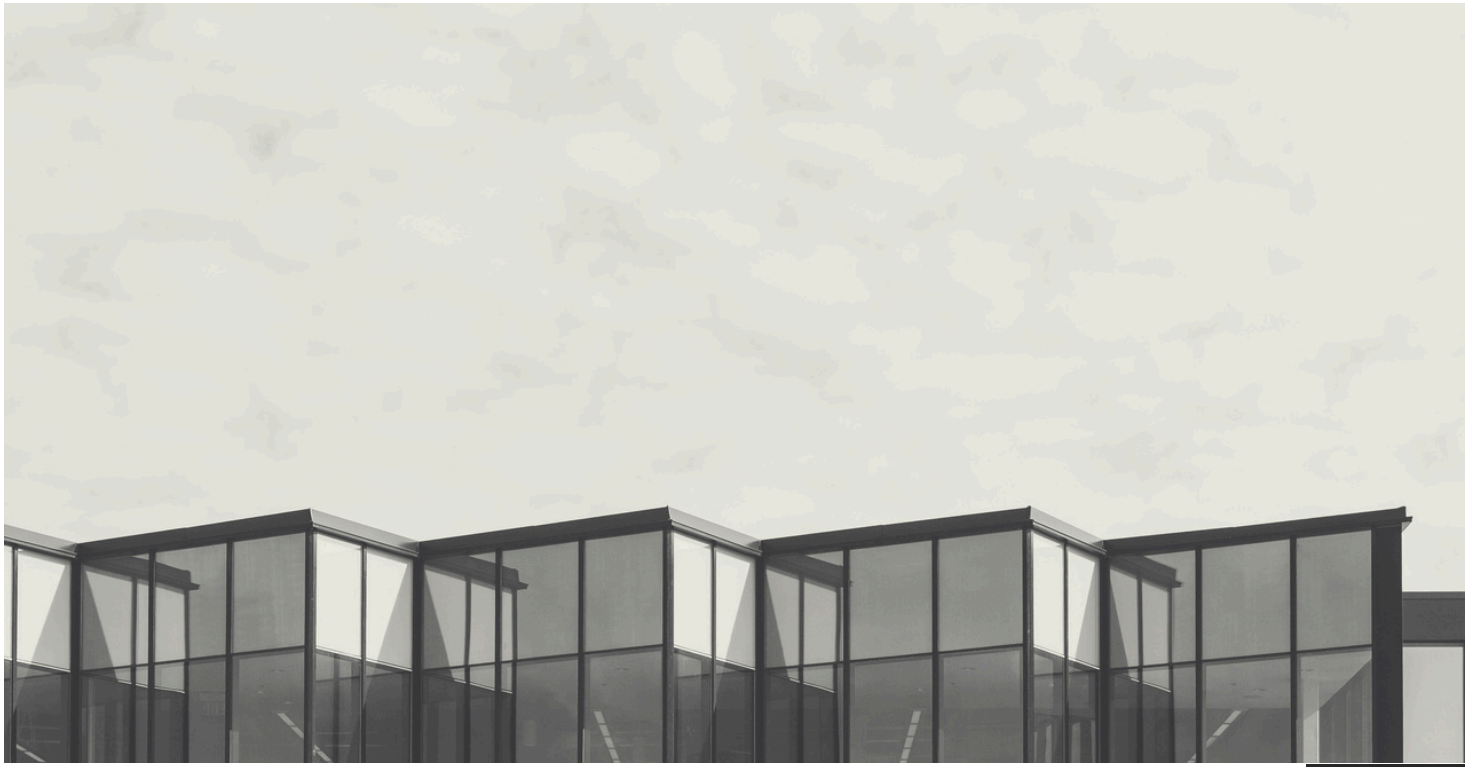

About Clerk & Counsel

Clerk & Counsel is a virtual clerksroom and practice management platform designed to help barristers build and grow successful independent practices.

We combine experienced clerking support with modern technology, business development and marketing to help barristers secure more instructions while reducing the administrative burden of running a practice.

Whether you are a sole practitioner, direct access barrister or member of chambers seeking additional support, our aim is to help you focus on practising law while we assist with the operational side of your practice.

What We Do

Our services include:

- Professional clerking support
- Diary and availability management
- Fee quotations and negotiations
- Business development and practice growth
- Direct access enquiry generation
- Solicitor relationship management
- Marketing and online visibility support
- Case management through our secure platform
- Administrative support throughout the lifecycle of a matter

We also help match barristers with appropriate enquiries, ensuring instructions are aligned with your expertise and availability.

Our Platform

Barristers joining Clerk & Counsel have access to a modern platform that enables them to:

- View and manage active matters
- Track enquiries and instructions
- Monitor key dates and deadlines
- Store case information securely
- Communicate efficiently regarding ongoing matters
- Maintain greater visibility over their practice

The platform is designed to complement, not replace, your existing way of working and can be used alongside your own systems where appropriate.

Independence

You remain an independent self-employed barrister.
You retain control over:

- Which instructions you accept.
- Your availability.
- Your practice areas.
- Your professional judgement and advice.
- Your relationship with your clients.

Our role is to support your practice through clerking, administration and business development.

Proposed Commercial Terms

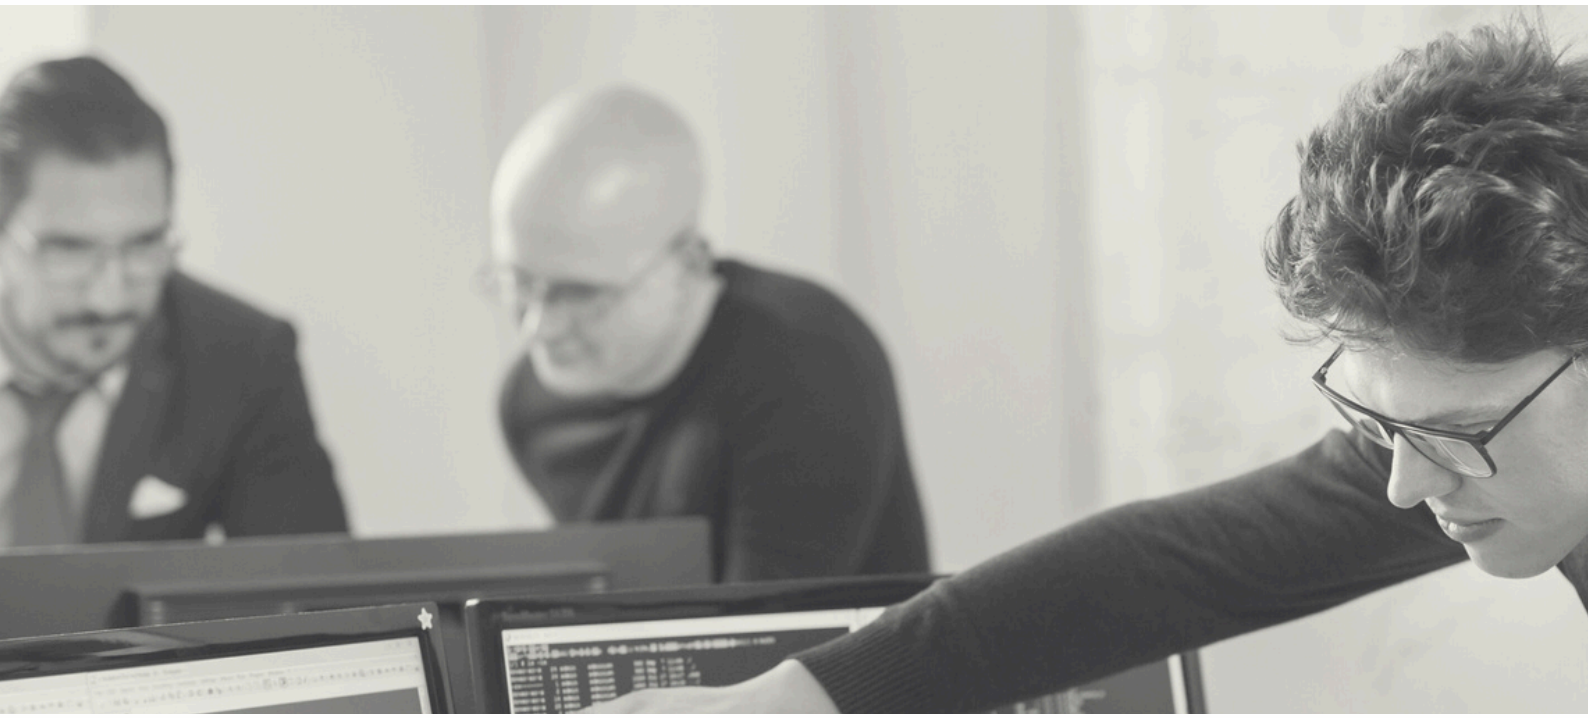

Our preferred model is simple and transparent:

- No chambers tenancy requirement.
- No long-term lock-in.
- No unnecessary overheads.
- A single agreed service fee linked to the clerking and practice support we provide.

The exact commercial arrangements are agreed individually and documented in writing before any work commences.

Client Relationships

Where appropriate, clients instruct the barrister directly and the barrister remains responsible for providing legal services and complying with all professional obligations.
Clerk & Counsel acts as a support and practice management partner, assisting with enquiries, administration and the smooth running of instructions.

Who We Work With

We welcome applications from barristers across England and Wales, including those practising in:

- Commercial law
- Property and construction
- Family law
- Employment
- Immigration
- Chancery
- Professional negligence
- Civil litigation
- Regulatory work
- Other specialist practice areas

Our Aim

Our objective is straightforward: to help barristers receive more quality instructions, reduce administrative pressures and benefit from the support of an experienced clerking team and modern technology without sacrificing the independence of their own practice.
